A bank compliance team in Amman cut off my climate pitch. They wanted to know: would this hit their green lending quota before the deadline.

Sustainability teams write the narrative, but they do not sign the purchase order.

Compliance teams own the quota. Missing it triggers a regulatory penalty, not a bad headline.

Local banks buy climate data because non-compliance costs are priced and dated. Goodwill is not.

Even advisory work linking data pipelines to Korean investors is pushed by a regulatory deadline, not an impact thesis.

> **If you underwrite frontier market climate exposure, stop reading ESG decks. Find out who gets penalized, and by when.**
