

A bank compliance team in Amman cut off my climate data pitch halfway through, wanting only one number.

Running programs across Jordan, Saudi Arabia, and Cambodia this year, the real buyer is never the sustainability team.

Sustainability teams write the narrative. They never sign the purchase order.

**Compliance teams own the quota.
Missing it means a regulatory
penalty, not a bad headline.**

Even my advisory work linking data to Korean investors is pushed by a regulatory deadline, not an impact thesis.

If you underwrite frontier climate exposure, stop reading ESG decks. Read the mandate: find who owns the quota and by when.
