

A bank compliance team in Amman cut off my climate data pitch halfway through. They did not want the impact story.

**Sustainability teams write the narrative.
Compliance teams own the quota and
sign the purchase order.**

**Missing a green lending quota
triggers a regulatory penalty, not a
bad headline.**

Local banks buy climate data because the cost of non-compliance is priced and dated. Goodwill is not.

Even advisory work linking data pipelines to investors is pushed by a regulatory deadline, not an impact thesis.

**Stop reading ESG pitch
decks. Read the mandate.
Find out who gets penalized,
and by when.**
