

A bank compliance team in Amman cut off my climate data pitch, asking only if it hit their green lending quota deadline.

Sustainability teams write the narrative. They do not sign the purchase order.

**Compliance teams own the quota.
Missing it triggers a regulatory penalty,
not a bad headline.**

Local banks buy climate data because the cost of non-compliance is priced and dated. Goodwill is not.

Even advisory work linking this data pipeline to Korean investors is pushed by a regulatory deadline, not an impact thesis.

If you underwrite frontier market climate exposure, stop reading ESG pitch decks. Read the mandate: find who gets penalized, and when.
